EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

AWS Services: EC2, S3, CloudFormation, API Gateway, RDS, Lambda, CloudWatch, Step Functions, CloudFront

Databases: PostgreSQL, MongoDB, Redis

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Languages: Python, Java, JavaScript/TypeScript, Rust, Html/Css

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **MCP** server with **FastMCP** exposing 160+ backend actions as **SaaS integration** endpoints, enabling **configuration**, **customization**, and **onboarding** of CRM workflows across multiple enterprise customers with role-based access control and **OpenTelemetry** instrumentation for real-time **troubleshooting**
- Delivered a **client-facing multi-agent** CRM platform using **Python**, **LangGraph**, **LangChain**, and **FastAPI** supporting 10,000+ users via 40+ specialized sub-agents with **tenant-aware** access control and **JWT** authentication
- Built **LlamaIndex**-powered **RAG** agents using OpenAI embeddings and **Pgvector** that answered product questions and generated ready-to-run **REST** API examples — serving as a self-service **technical documentation** and **implementation** guide for customer **onboarding**
- Built **GitHub Actions** **CI/CD** pipelines for AI-agent **deployment**, with **OpenTelemetry** trace-based evals that flagged latency, accuracy, and safety regressions before production across a multi-tenant **SaaS** platform

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** — integrating **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs for enterprise **client onboarding** and multi-cloud **implementation**
- Orchestrated long-running jobs with **AWS Step Functions**, resolving **AWS Lambda** timeout failures and improving error recovery across **100K+** weekly executions through systematic **troubleshooting**
- Reduced query latency and improved **SaaS** platform scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes; surfaced insights via interactive **React** dashboards for business stakeholders

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that decomposes large requests into dependency-aware task DAGs, executing them across multi-machine AI agents with retries, timeout handling, and detailed **documentation** of results
