EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript, Rust
AWS Services: CloudWatch, EC2, Lambda, Step Functions, API Gateway, RDS, S3, CloudFormation, CloudFront
Others: CI/CD, Google Cloud, Git, Kafka, Node.js
Frameworks: FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, React, Sprint Boot
Databases: PostgreSQL, MongoDB, Redis
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Led systems automation/scripting initiatives that translated natural-language intents into safe, validated tool calls across 1000+ platform endpoints, improving operational consistency for enterprise workflows. - Implemented a monitoring standard with Langfuse, LangSmith, and CloudWatch using metrics, logs, and system alarms to strengthen cross-service system integration and monitoring, troubleshooting, and preventative maintenance. - Optimized prompt routing and agent concurrency to improve stability during high severity incidents, reducing latency by 60% and LLM API costs by 50%.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Built and tuned distributed GPU pipelines with CUDA and PyTorch on Pace University's HPC cluster, applying repeatable runbooks and OS lifecycle management. - Used vLLM and Hugging Face for secure model serving, standardizing deployment validation with python/bash utilities. - Conducted workshops for 50+ students on CUDA, Mojo, and agent architecture, translating complex technical tradeoffs into operational guidance.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis for Google Cloud Storage, S3, and MinIO, applying enterprise deployment strategies for server OS, Virtualization, and secure system configurations in AWS/Azure cloud environments. - Developed AWS Step Functions and Lambda workflows for long-running imports, applying Tuning and troubleshooting OS (CPU, Memory and I/O, Cloud deployments) playbooks to improve resilience. - Supported enterprise Server Operating Systems across Unix, RHEL 6/7/8 and CentOS and Red Hat estates, applying Ansible as orchestration tool and python/bash as scripting language for disciplined Patch management and Vulnerability Management.	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built an event-driven PTY orchestrator that validates and logs every command before execution, reinforcing operational governance for automation-heavy command flows. - Implemented distributed Y-crdt signaling loops for multi-host execution without polling, improving orchestration reliability and reducing manual intervention.
