EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, Java, TypeScript/JavaScript, SQL, Bash, Rust

Software Fundamentals: Data structures, algorithms, system design, testing, distributed systems, object-oriented design

Services & APIs: FastAPI, Spring Boot, REST APIs, microservices, Temporal, LangGraph, FastMCP

Data & Infrastructure: PostgreSQL, Redis, MongoDB, AWS, Docker, Kubernetes, GitHub Actions CI/CD

Frontend & Quality: React, React Flow, OpenTelemetry, automated testing, monitoring, performance analysis

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Designed, built, and launched production **software components, services, and APIs** in Python and FastAPI, routing requests across 40+ distributed services for 10,000+ users with secure access control
- Built a TypeScript and React Flow product end-to-end, partnering with product and engineering stakeholders to turn ambiguous workflow ideas into durable, customer-facing features powered by Temporal and Redis
- Developed a production MCP service exposing 160+ validated backend actions with structured schemas, monitoring, and tenant-aware authorization, operating reliable systems at scale
- Evaluated reliability and performance through OpenTelemetry trace-based tests and GitHub Actions **CI/CD** gates, detecting latency, accuracy, and safety regressions before deployment
- Created proof-of-concept developer tooling by integrating OpenAI Codex with Bitbucket, then productionized it to automate 25–30 pull-request reviews/week and save engineers several hours

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed and launched a cloud-agnostic service in Java and Spring Boot with PostgreSQL and Redis, delivering secure REST APIs across AWS S3, Google Cloud Storage, and MinIO
- Improved service performance and scalability by optimizing PostgreSQL window functions, materialized views, and indexes, then delivered React visualizations for business stakeholders
- Operated distributed workloads with AWS Step Functions and Lambda, improving timeout handling and error recovery across **100K+ weekly executions**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript, Docker*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent system that executes dependency-aware task DAGs across machines with concurrency controls, retries, timeout handling, testing, and failure recovery
