EDUCATION

Pace University	NYC, NY
<i>MS in Computer Science (GPA: 4.0/4.0)</i>	<i>Jan 2024 - Dec 2025</i> Dr. A.P.J. Abdul Kalam Tech Univ
<i>B.Tech in Computer Science</i>	<i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Generative AI: LLMs, RAG, Prompt Engineering, Fine-tuning, Hugging Face, vLLM, Langfuse, CUDA
Frameworks: PyTorch, LangGraph, LangChain, LangSmith, FastAPI, FastMCP, React, Sprint Boot
Lang & Cloud: Python, Java, JS/TS, Rust | AWS (EC2, S3, Lambda, Step Functions), GCP, Git, Agile
DBs & Others: PostgreSQL, MongoDB, Redis, Vector Databases | CI/CD, Kafka, Node.js

PROFESSIONAL EXPERIENCE

Software Engineer	Phoenix, AZ
Sperse	<i>Feb 2026 - present</i>

- Architected a **Python-based GenAI layer** translating natural-language intents into **validated tool calls** across **1000+ platform endpoints**, automating customer workflows and actions
- Built **generative code solutions** and **APIs** (SDK patterns) to accelerate developer integration with **LLM-driven platform features** and improve implementation correctness
- Engineered an **observability layer** using **Langfuse** and **LangSmith** for **tracing** and **performance tuning**, reducing latency by **60%** and lowering API costs by **50%** in an **Agile** environment

AI Researcher	New York City, NY
Pace Artificial Intelligence Lab	<i>Sep 2025 - Dec 2025</i>

- **Fine-tuned Generative AI models** (StyleGAN, Stable Diffusion) using **PyTorch** and **LoRA** on an **HPC cluster** for high-fidelity design generation and **model training**
- Optimized inference using **vLLM** and **Hugging Face**, ensuring efficient serving and **performance tuning** for large-scale generative architecture tasks and **data pipelines**

Software Engineer	Noida, India
Qualitest	<i>Feb 2021 - Dec 2023</i>

- Built an internal support chatbot using **Python**, **LangChain**, and **RAG** with a **PostgreSQL** vector store, reducing resolution time by **20%** via natural language search
- Developed a **Python-based** storage service to automate file operations across **AWS S3** and **GCP** via secure signed URLs, ensuring high availability and system stability
- Created automated **data pipelines** using **AWS Step Functions** to handle high-volume data jobs, following **Agile** and **Git** version control best practices

PROJECTS

Dark Factory - AI Coding Orchestrator <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
• Built a Python-integrated CLI orchestrator for secure execution of AI-generated shell commands with real-time logging and event-driven agentic loops for distributed coordination
