EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust, Html/Css

Backend & Frameworks: Spring Boot, FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a multi-agent CRM platform in **Python**, **LangGraph**, **LangChain**, and **FastAPI** that routes requests across 40+ sub-agents with tenant-aware access control and **RESTful APIs** for internal integrations.
- Engineered a production **MCP** server with FastMCP exposing 160+ tool calls over a multi-tenant **.NET framework** backend, with Pydantic validation and OpenTelemetry instrumentation for reliable release and support workflows.
- Built OpenTelemetry trace-driven eval suites and **GitHub Actions CI/CD** gates that replay real conversations, score latency and tool-call accuracy, and flag unsafe behavior before production deploys.
- Delivered **LlamaIndex**-powered RAG agents over technical documentation using OpenAI embeddings in **pgvector**, generating ready-to-run **REST** API examples and improving self-serve support.

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic storage service in **Java** and **Spring Boot** for **enterprise applications** and document workflows, documenting **functional and technical specifications** that normalized **documents and metadata** in **PostgreSQL** and exposed **RESTful APIs** across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs; the same patterns apply to **IBM FileNet** to **SharePoint migration utilities**.
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions, a control-plane pattern suited to scheduled **WebSphere** and **FileNet fix packs** and platform maintenance.
- Optimized **PostgreSQL** with window functions, materialized views, and indexes, then surfaced the results through interactive **React** visualizations to accelerate triage of **ServiceNow** incidents and **service requests**.

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that decomposes large requests into dependency-aware task DAGs with retries and timeout handling, reinforcing the specification-first workflow discipline needed for enterprise integration and automation.
