EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, Rust, Html/Css

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: EC2, RDS, Lambda, CloudWatch, API Gateway, Step Functions, S3, CloudFormation, CloudFront

Others: CI/CD, Docker, Kubernetes, Git, OpenAI Agents SDK, Google ADK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Took end-to-end ownership of **backend projects** for a multi-agent CRM platform using **JavaScript**, **TypeScript**, **Node.js** service patterns, **Python**, and **FastAPI**, delivering **robust APIs** that served 10,000+ users across 40+ specialized sub-agents with secure access control
- Built a **React Flow** and **TypeScript** visual workflow platform for users to create, run, and manage agentic swarms, handling **asynchronous processes** with durable **Temporal** execution, **messaging queues**, and **Redis** progress tracking for live workflow status
- Created a **FastMCP** server exposing 160+ backend actions as safe, validated tool calls, strengthening API integration contracts (**RESTful** patterns and **GraphQL APIs** schemas), tenant-aware access control, and built-in monitoring for reliable CRM workflow automation
- Built GitHub Actions **CI/CD** pipelines for AI-agent deployments, running OpenTelemetry trace-based **QA testing** to flag latency, accuracy, safety, and release-quality regressions before production
- Built **LlamaIndex**-powered RAG agents using OpenAI embeddings and Pgvector to answer product questions and generate ready-to-run **RESTful** API examples for **JavaScript**, **TypeScript**, and **Node.js** consumers

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed, built, and maintained a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **SQL databases** (**Postgres** and **PostgreSQL**) and **Redis**, delivering **RESTful** file APIs for uploads, downloads, and deletions across **S3**, Google Cloud Storage, and MinIO via expiring signed URLs
- Leveraged **AWS services** (**EC2**, **EBS**, **RDS**, **Lambda**, **CloudWatch**, **Step Functions**, **S3**) to create robust **cloud-based solutions**, troubleshoot complex technical issues, and improve error recovery across **100K+** weekly executions
- Reduced query latency and improved **scalability** for **high performance** reporting by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for product and business stakeholders

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine agents with retries, timeout handling, and **high performance** scheduling
- Designed **TypeScript** orchestration surfaces and Elixir workers for long-running **asynchronous processes**, preserving ordering across dependent steps while allowing independent tasks to run in parallel
