EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust
Others: Google Cloud, CI/CD, Git, Node.js, Kafka
Frameworks: React, Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
Databases: PostgreSQL, Redis, MongoDB
AWS Services: Lambda, Step Functions, API Gateway, CloudWatch, S3, EC2, RDS, CloudFormation, CloudFront
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Developed Google cloud-based software applications using Java, JavaScript/TypeScript, React JavaScript libraries, and an Angular JavaScript framework approach, enabling safe automation across 1000+ platform endpoints - Applied Software Design Methods and Implementation with Java Patterns (Core Java multithreading and multi-tasking) to build concurrent orchestration, then delivered unit and integration test software, automatic build and test scripts, and software documentation for Cross-Team / Customer Interaction in Daily Stand-ups, Sprint Planning Meetings, and Sprint Review Meetings	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Designed StyleGAN and Stable Diffusion pipelines with PyTorch, CUDA, LoRA, and vLLM on an HPC cluster, emphasizing Measurement/Instrumentation and repeatable quality checks - Led workshops for +50 students on GPU programming and agent systems using Agile Methods (iterative demos, feedback loops, collaborative planning)	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed, coded, and tested vehicle communication modules using CAN and 14229 Protocols, while partnering across 30+ applications to support integration of HMI components with other core framework components - Built backend automation for unit and integration test software, release scripts, and automatic build and test gates; delivered a LangChain + RAG assistant on PostgreSQL vector search that cut ticket time by 20% through strong Cross-Team / Customer Interaction and agile methodology	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built an event-driven orchestrator that owns CLI PTY I/O with command policy checks, improving reliability for integration-heavy workflows and automated validation loops - Implemented distributed coordination with Y-crdt for real-time cross-machine state, enabling low-latency instrumentation and debuggable multi-agent execution
