EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Full-Stack Development: Python, SQL, Java, JavaScript/TypeScript, React, FastAPI, Spring Boot, REST APIs, HTML/CSS

Databases & Cloud: PostgreSQL, Redis, AWS (S3, Lambda, Step Functions), Google Cloud Storage, MinIO

Software Engineering: UI design, database creation, process design, coding, testing, troubleshooting, debugging, security, scalability

Tools & Practices: Git, CI/CD, Docker, OpenTelemetry, GitHub Actions, Microsoft/Office 365 Suite, English (written and verbal proficiency)

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Programmed **front-end and back-end solutions** for a 10,000+ user CRM using **Python, SQL, FastAPI, React**, and **TypeScript**, improving operational efficiency, quality, and speed through full-stack development
- Partnered with **cross-functional user teams** on innovative **UI designs** for a React Flow builder, translating end user problems into prototypes and durable execution across 40+ specialized agents
- Designed, coded, tested, troubleshoot, debugged, and documented reusable, testable, and efficient code for a **FastMCP** service exposing 160+ secure actions; detailed specifications and logic diagrams guided validation, access control, and long-term maintenance
- Built **CI/CD** and OpenTelemetry performance metrics measuring latency, safety, usage, and growth projections to guide scalability and collaborate with company developers on technical solutions and implementation

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed operational software in **Java, Spring Boot**, and **SQL**, combining database creation with REST file workflows across Google Cloud Storage, S3, and MinIO through secure expiring URLs
- Improved scalability and troubleshooting by optimizing **PostgreSQL** (window functions, materialized views, indexes) and exposing performance metrics through interactive **React** visualizations
- Designed, coded, tested, debugged, and documented Step Functions and Lambda processes for 100K+ weekly executions, applying security best practices with developers, QA, and cross-functional stakeholders in a fast-paced, high-energy environment

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a full-stack distributed orchestrator that translates strategy into a technical vision using prototypes and simulations, executing dependency-aware logic across machines with reusable, testable components, dashboards, retries, and timeouts
- Applied communication and problem-solving skills to document system behavior and tackle a wide range and variety of problems spanning process design, debugging, performance, and end user visibility
