EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, Rust, JavaScript/TypeScript
Infrastructure & Automation: CI/CD, Linux/Unix, CloudFormation, Infrastructure automation, Deployment pipelines
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Frameworks: FastAPI, Spring Boot, LangGraph, LangChain, React, PyTorch
Databases: PostgreSQL, MongoDB, Redis
Others: Google Cloud, Git, Kafka, Node.js

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected a platform integration layer automating 1000+ endpoint workflows with safe, validated execution, enabling scalable automation with minimal human intervention - Designed complex workflows and business rules for code generation (API templates, SDK patterns, code-generation) to accelerate integrations and improve correctness - Built observability and monitoring using Langfuse and LangSmith with tracing, structured logs, and evaluation hooks to troubleshoot and resolve issues and track quality - Implemented performance optimization strategies for routing and concurrency, reducing latency by 60% and API costs by 50%, enhancing system responsiveness and scalability	
AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on StyleGAN and Stable Diffusion using CUDA, PyTorch and LORA on HPC cluster, optimizing training for high-performance at global scale - Deployed inference infrastructure using vLLM with Hugging Face, ensuring secure, reliable, efficient serving with minimal operational overhead - Developed training materials and conducted workshops on GPU programming and AI Agents for 50+ students, providing support and documentation	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built support automation using LangChain and RAG with PostgreSQL vector store, reducing resolution time by 20%, optimizing workflows - Designed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis handling operations across Google Cloud Storage, S3, and MinIO, enabling scalable, reliable multi-cloud infrastructure - Contributed to Identity & Access Management platform using React, Spring Boot, and AWS, supporting thousands of users across 30+ applications - Developed automation workflows using AWS Step Functions for long-running data jobs, preventing Lambda timeouts, ensuring scalable, reliable processing	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Enables full ownership of CLI IO via PTY, validating and logging every command before Linux/Unix shell execution, ensuring safe and auditable automation - Provides distributed orchestration across machines using Y-crdt for real-time coordination, enabling scalable multi-node workflows with minimal latency
