EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Frameworks: Sprint Boot, React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
Databases: PostgreSQL, MongoDB, Redis
Others: CI/CD, Kafka, Git, Google Cloud, Node.js
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Delivered an MCP AI layer translating natural-language into validated tool calls across 1000+ platform endpoints, serving as core middleware for automated customer actions - Built generative code solutions (API-aware templates, SDK patterns) to accelerate integration with platform APIs and ensure scalable software implementations - Enabled observability using Langfuse and LangSmith for tracing and structured logs to monitor integration solutions, debug failures, and track system health - Architected a concurrent multi-agent orchestration system using LangChain and LangGraph, enabling reliable coordination and scalability across enterprise software	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on generative models using CUDA, PyTorch and LORA on an HPC cluster, implementing complex technical concepts and modern tech stacks - Utilized vLLM for model inference with Hugging Face, ensuring secure and efficient cloud-native model serving in hybrid environments	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Contributed to an IAM platform using Java, Spring Boot, and AWS, supporting thousands of users across 30+ apps in a Java Enterprise environment - Developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis to integrate middleware operations across S3 and GCS via signed URLs - Developed backend workflows using AWS Step Functions for long-running data imports, ensuring reliable integration solutions in cloud environments - Built an internal support chatbot using LangChain and RAG with PostgreSQL, reducing ticket resolution time by 20% via enterprise documentation	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Enables full ownership of CLI IO via PTY, implementing middleware logic to log and validate every command before execution by the bash shell - Provides event-driven agentic loops for real-time updates, utilizing Y-crdt for distributed coordination across scalable machine clusters
