EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Python, Rust, HTML/CSS

Backend & Frameworks: Spring Boot, FastAPI, React, LangGraph, LangChain, REST APIs

Databases: PostgreSQL, MongoDB, Redis

AWS Services: S3, Lambda, Step Functions, CloudWatch, API Gateway, EC2, RDS

Others: Git, CI/CD, Docker, automated unit and integration testing, Claude Code, Codex CLI

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Delivered customer-facing **UX flows and UI components** in React Flow and TypeScript, helping users visually create, run, and manage durable agent workflows backed by Temporal
- Built a full-stack **multi-agent CRM** with Python, LangGraph, LangChain, and FastAPI, securely routing requests across 40+ specialized agents for 10,000+ users
- Automated daily code-review work with **AI agents** and an OpenAI Codex/Bitbucket MCP pipeline, triaging 25–30 PRs weekly and saving reviewers several hours
- Used **Claude Code and Codex CLI** to automate CI/CD pipelines, error monitoring, and automated testing, flagging latency, accuracy, and safety issues before deployment
- Built a monitored **FastMCP backend** exposing 160+ secure actions, enabling AI agents to automate customer CRM workflows while preserving access controls
- Added Redis-backed live progress tracking for long-running Temporal workflows, letting users monitor execution and recovery from the product dashboard

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a **Java and Spring Boot** storage service with PostgreSQL and Redis, giving users portable file operations across Amazon S3, Google Cloud Storage, and MinIO
- Orchestrated long-running AWS jobs with **Step Functions**, preventing Lambda timeouts and improving error recovery across 100K+ weekly executions
- Optimized PostgreSQL queries with indexes, materialized views, and window functions, then delivered React visualizations that made results accessible to business stakeholders
- Used **AI agents** to automate test-case preparation for Java storage workflows, giving engineers repeatable coverage of file upload, download, and deletion paths

PROJECTS

TruthFlow Mobile Fit | *Python, LangGraph, LangChain*

github.com/ozzyozbourne/truthflow-mobile-fit

- Built a five-stage job-analysis workflow that maps requirements to approved evidence, reports unsupported native-mobile claims as gaps, and exports traceable Markdown or JSON
- Added structured logging, strict validation, error handling, and GitHub Actions **CI/CD**; 14 unit and integration tests pass with 99% local statement coverage
