EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Databases: PostgreSQL, Redis, MongoDB

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Languages: Java, Python, JavaScript/TypeScript, Rust, Html/Css

AWS Services: RDS, S3, API Gateway, Lambda, Step Functions, CloudWatch, EC2, CloudFormation, CloudFront

Others: Git, CI/CD, Claude Code, OpenAI Agents SDK, LlamaIndex, Docker, Kubernetes, Google ADK

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built an **OpenAI Codex** and **Claude Code** assisted code review pipeline around **Bitbucket**, pairing manual review with code analysis, routing findings into the **issue tracking system**, and triaging 25-30 PRs/week to cut reviewer load by several hours
- Designed a **multi-agent** CRM platform in **Python**, **LangGraph**, **LangChain**, and **FastAPI** that served 10,000+ users by routing requests across 40+ specialized sub-agents with secure access control and reusable integration patterns for **Sitecore** add-ons and translation management systems
- Created a production **MCP** server with **FastMCP** exposing 160+ backend actions, adding trace-based evals, bug-fix verification, and **GitHub Actions** **CI/CD** gates so product changes were documented and safe to release
- Built **LlamaIndex**-powered **RAG** agents using OpenAI embeddings and **Pgvector**, plus durable **React** Flow workflows with live progress tracking in **Redis**, to answer product questions and support troubleshooting across long-running runs

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handled file uploads, downloads, and deletions for content and translation workflows across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs and **REST** service boundaries
- Reduced query latency and improved scalability by optimizing **SQL** interactions in **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for business stakeholders and bug verification
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions while keeping operational runbooks current for cross-team support

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries, timeout handling, and reusable workflows for other applications
