EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript/TypeScript, Java, Python, Rust

Backend & Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: CloudWatch, API Gateway, Step Functions, Lambda, S3, RDS, EC2, CloudFormation, CloudFront

Others: OpenAI Agents SDK, Google ADK, LlamaIndex, Claude Code, CI/CD, Docker, Kubernetes, Git

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **multi-agent** CRM platform using **Python**, **LangGraph**, **LangChain**, and **FastAPI**, serving 10,000+ users by routing requests across 40+ specialized sub-agents with secure access control and a technical architecture built for **agile** delivery of new capabilities
- Built a **React Flow** and **TypeScript** visual workflow platform for client-facing web applications, using **Temporal** for durable, resumable execution and improving maintainability for long-running workflows
- Built an agentic code review pipeline integrating **OpenAI Codex** with a custom Bitbucket **MCP** server, automating daily PR triage across 25-30 PRs/week and reducing manual reviewer load by several hours
- Created a **FastMCP** server giving AI agents access to 160+ backend actions, adding **monitoring** and guardrails to automate CRM workflows securely across multiple customers
- Built **GitHub Actions CI/CD** pipelines for AI-agent deployments, running **OpenTelemetry** trace-based evals and **automated tests** to improve release quality and flag **latency**, **accuracy**, and **safety** issues before production

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handles file uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs, supporting ongoing **application support** and **maintenance** across multiple environments
- Reduced query latency and improved scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data via interactive **React** visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery and **troubleshooting** across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling
- Extended the orchestration model for **AI-driven development** workflows, adding durable execution and failure recovery for larger codebases
