EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, Rust, HTML/CSS

Backend & APIs: Spring Boot, RESTful APIs, FastAPI, microservices, application support

AWS & Data: Lambda, S3, SNS/SQS, DynamoDB, Step Functions, RDS, CloudWatch, PostgreSQL, Redis

Delivery & AI: Git, CI/CD, GitHub Actions, Docker, Kubernetes, unit testing, OpenAI Codex, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Developed and supported **Python/FastAPI RESTful APIs** for a multi-agent CRM platform serving 10,000+ users, routing requests across 40+ specialized agents with secure validation, monitoring, and production troubleshooting
- Built a **React** and **TypeScript** workflow application backed by Temporal services, owning end-to-end enhancements, data contracts, error recovery, code reviews, deployments, and application reliability
- Created a Bitbucket MCP integration for **OpenAI Codex**, automating daily PR triage across 25–30 PRs per week and reducing manual reviewer effort by several hours through AI-assisted development
- Implemented progress tracking for long-running workflows with **Redis** and structured observability, diagnosing production issues and improving recovery across distributed services
- Built **GitHub Actions CI/CD** pipelines with OpenTelemetry trace-based evaluations, catching latency, accuracy, and safety regressions before production releases

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed and maintained a cloud-agnostic service in **Java** and **Spring Boot** with **PostgreSQL**, **Redis**, and **RESTful APIs**, supporting secure file operations across **AWS S3**, Google Cloud Storage, and MinIO
- Troubleshoot application and database issues by optimizing **PostgreSQL** queries with indexes, window functions, and materialized views, reducing latency while preserving data integrity for production reporting
- Orchestrated 100K+ weekly jobs with **AWS Step Functions** and **Lambda**, preventing timeouts and improving retry-based error recovery across cloud-hosted applications and services
- Wrote unit tests, participated in code reviews, and supported deployments and release activities through **Git**-based version control and **CI/CD** processes

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that converts requests into dependency-aware task DAGs and executes them across multiple machines with retries, timeout handling, and observable status updates
- Implemented fault-tolerant scheduling and Git-based change workflows, preserving dependency order while recovering safely from failed agent executions
