EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust

Frameworks: React, FastAPI, FastMCP, LangChain, LangGraph, LangSmith, PyTorch, Sprint Boot

AWS Services: Lambda, Step Functions, CloudWatch, API Gateway, S3, RDS, EC2, CloudFormation, CloudFront

Databases: PostgreSQL, Redis, MongoDB

Others: Node.js, CI/CD, Kafka, Google Cloud, Git

AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Spense

Feb 2026 - present

- Led **requirements analysis** with product teams to deliver technical and business solutions, translating natural-language intents into **safe, validated tool calls** across **1000+ platform endpoints** for **business-critical features** in AI-powered customer communications and **voice solutions**
- Owned **design, architecture, end-to-end delivery**, and **deployment** of a **concurrent multi-agent** system (**LangChain**, **LangGraph**), writing clean scalable code and **revising, updating, refactoring, and debugging** services for high quality, **secure** customer workflows across **Typescript/Node.js** and Python services
- Built **live site monitoring** with **Langfuse** and **LangSmith** (**tracing**, structured logs, evaluation hooks) and drove **performance optimization** via routing/concurrency tuning, cutting latency by **60%** and LLM API cost by **50%**

AI Researcher

New York City, NY

Pace Artificial Intelligence Lab

Sep 2025 - Dec 2025

- Researched **StyleGAN** and **Stable Diffusion** using **CUDA**, **PyTorch**, and **LORA (Low-rank Adaptation)** on an **HPC cluster** to run production-style experimentation for **LLM development** adjacent workflows
- Used **vLLM** with **Hugging Face** to **test and deploy applications and systems** for secure, efficient inference with reproducible evaluation runs
- Led workshops for **+50** students on GPU programming with **CUDA** and **Mojo**, and on **AI Agents** using **LangChain**, **LangGraph**, and **LangSmith** to strengthen technical communication

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Delivered **full-stack software engineering** product features and **frontend applications** for an Identity & Access Management platform using **React**, **Spring Boot**, and **AWS**, supporting thousands of users across **30+ applications**
- Designed and developed a cloud-agnostic Storage Service with **Python**, **PostgreSQL**, and **Redis** for file operations across **Google Cloud Storage**, **S3**, and **MinIO** using expiring signed URLs
- Developed backend workflows with **AWS Step Functions** to handle long-running data imports and prevent **AWS Lambda** timeouts, supporting **on-call rotation** to respond to **critical system issues** and ensure **continuous system reliability**

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs | *Crosstern*, *Ratatui*, *Y-crdt*

github.com/ozzyozbourne/dark-factory

- Built a PTY-first orchestration runtime that validates and logs every command before execution, enabling secure **operation** of distributed AI coding workflows
- Designed an **event-driven** coordination loop with **Y-crdt** to keep multi-machine agents synchronized with **real-time** updates and lower polling overhead
