EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Html/Css, Go, Java, Python, Rust
Frontend & Frameworks: React, Node.js, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code
Databases: PostgreSQL, MongoDB, Redis

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Built a React and TypeScript visual workflow platform with React Flow, delivering accessible, responsive user-facing interfaces and reusable shared components with modern HTML/CSS that let users create, run and manage agentic swarms across large-scale web applications - Instrumented features for observability and experimentation (A/B testing), wiring GitHub Actions CI/CD pipelines with OpenTelemetry trace-based evals to define success metrics and flag latency, accuracy and safety regressions before production release - Participated in the full development lifecycle (technical design, implementation, code review, testing, release) for Node.js web applications and Go-based APIs, integrating OpenAI Codex with a custom Bitbucket MCP server to automate daily PR triage across 25–30 PRs/week - Built a multi-agent CRM platform with Node.js, Python, LangGraph, LangChain and FastAPI server-side services on the AWS cloud platform, serving 10,000+ users by routing requests across 40+ specialized sub-agents with secure access control - Added live progress tracking for long-running Temporal workflows using Redis, debugging and resolving production issues with logs, metrics and monitoring while supporting an on-call rotation for the systems I helped build	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Optimized PostgreSQL with window functions, materialized views, and indexes to reduce query latency and improve web performance, then exposed the data via interactive React visualizations with modern HTML/CSS and JavaScript for business stakeholders - Designed a cloud-agnostic Storage Service in Java and Spring Boot with PostgreSQL and Redis handling server-side file uploads, downloads, and deletions across Google Cloud Storage, S3, and MinIO via expiring signed URLs - Orchestrated long-running jobs with AWS Step Functions, reducing AWS Lambda timeouts and improving error recovery across 100K+ weekly executions, authoring detailed technical documentation of tradeoffs and rationale	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
Built a distributed coding-agent orchestrator in Elixir and TypeScript that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling
