

# Osaid Khan

+1 (945) 304-5781 | [khanosaid726@gmail.com](mailto:khanosaid726@gmail.com) | [www.linkedin.com/in/-osaid-khan/](https://www.linkedin.com/in/-osaid-khan/) | [github.com/ozzyozbourne](https://github.com/ozzyozbourne)

## EDUCATION

### Pace University

*Master of Science (MS) in Computer Science (GPA - 4.0/4.0)*

New York City, NY

Jan 2024 - Dec 2025

### Dr. A.P.J. Abdul Kalam Technical University

*Bachelor of Technology (B.Tech) in Computer Science*

Noida, India

Jul 2016 - Sep 2020

## TECHNICAL SKILLS

**Languages:** C++, Kotlin, TypeScript, Swift, Java, JavaScript, Python

**Frameworks & UI:** Shared UI Frameworks, React, SwiftUI, Spring Boot, FastAPI, FastMCP

**Systems & APIs:** Low-Level Networking, Authentication APIs, REST APIs, Distributed Systems, API Design

**Platforms:** Mobile, Desktop, Smart TVs, Game Consoles, AWS

**Quality & Delivery:** Unit Testing, Integration Testing, Documentation, Git, CI/CD

## PROFESSIONAL EXPERIENCE

### Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Architected **TypeScript**, **Kotlin**, and **Swift shared UI frameworks** to implement new features across a variety of platforms and devices (mobile, desktop, Smart TVs, and game consoles), delivering intuitive interfaces and exceptional customer experiences
- Designed and implemented **low-level networking and authentication APIs** in **C++**, **FastAPI**, and **FastMCP shared frameworks**, exposing 160+ secure backend actions with validated contracts, access control, and production monitoring
- Worked with **cross-functional teams on integration and adoption** of framework APIs and design-system components, translating product and design requirements into business-critical features serving 10,000+ users
- Established engineering practices to **build tests and write documentation** (unit, integration, API contracts, and adoption guides), using GitHub Actions CI/CD and OpenTelemetry evaluations to improve quality and attention to detail
- Demonstrated aptitude to **independently learn new languages and frameworks**, applying **strong programming fundamentals** to a 40+ agent distributed system while automating 25-30 PRs/week and reducing reviewer load by several hours

### Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed and implemented cross-platform **Java**, **Kotlin**, and **C++ APIs** for uploads, downloads, and authentication via expiring signed URLs across Google Cloud Storage, S3, and MinIO, backed by PostgreSQL and Redis
- Built business-critical features with **AWS Step Functions** and **Lambda** across 100K+ weekly executions, adding automated tests, failure recovery, and operational documentation to prevent timeouts
- Collaborated cross-functionally with design and business stakeholders to craft intuitive **React** interfaces and drive integration and adoption of optimized PostgreSQL APIs, reducing query latency and improving scalability
- Developed reusable networking and storage framework components with clear API boundaries, enabling teams to independently adopt new languages, platforms, and device-specific integrations

## PROJECTS

**Dark Factory - orchestrator for PI agent** | *C++, Kotlin, TypeScript, Swift* [github.com/ozzyozbourne/dark-factory](https://github.com/ozzyozbourne/dark-factory)

- Built a multi-platform distributed-system framework with shared **C++**, **Kotlin**, **TypeScript**, and **Swift APIs**, executing dependency-aware task DAGs across devices with retries and timeout handling
- Created integration tests and developer documentation for networking, authentication, and shared framework adoption, emphasizing programming fundamentals, modular interfaces, and production quality
