EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, Rust, Python
Frameworks: React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Databases: PostgreSQL, Redis, MongoDB
AI: Claude code, Codex, Pi coding-agent
Others: Git, CI/CD, Kafka, Node.js, Google Cloud

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Designed system architecture across services and APIs for an MCP layer that converts natural-language intents into safe, validated tool calls across 1000+ platform endpoints, enabling reliable automated customer actions. - Built modular backend components with Langfuse and LangSmith observability plus caching optimization, meeting standards for scalability, performance, security, accessibility, and localizability while accelerating bug fixing and improving Performance, Scale and Availability (latency −60%, LLM API cost −50%).	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Developed and evaluated StyleGAN and Stable Diffusion pipelines with CUDA, PyTorch, and LORA (Low-rank Adaptation) on Pace University’s HPC cluster, balancing model quality, runtime cost, and reproducibility. - Built secure inference and deployment flows using vLLM and Hugging Face, applying disciplined Development and Test methodologies to improve serving performance, reliability, and readiness for collaborative code reviews.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Delivered frontend and backend features for an Identity & Access Management platform using React, Spring Boot (Java), and AWS, supporting thousands of users across 30+ applications with production-grade reliability. - Designed a cloud-agnostic Storage Service (Python, PostgreSQL, Redis) across Google Cloud Storage, S3, and MinIO with signed URLs; evaluated Dynamo tradeoffs and built AWS Step Functions workflows across cloud infrastructure plus targeted unit and feature tests to improve availability, extensibility, and ticket resolution by 20%.	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Engineered PTY-level orchestration for AI-assisted development tools (including Claude Code, GitHub Copilot, and Cursor) that validates every command before bash execution, improving operational safety and auditability. - Implemented event-driven distributed loops with Y-crdt to synchronize multi-agent execution and broadcast real-time status updates without polling, improving throughput and coordination across shared workflows.
