EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, HTML, CSS3, SQL, Rust

Backend & Web: Server side development, Spring Boot, FastAPI, REST APIs, React, distributed systems

Cloud & Data: AWS, GCP, S3, Lambda, Step Functions, Google Cloud Storage, PostgreSQL, Redis, MongoDB

Engineering: Computer Science Fundamentals, data structures, algorithms, Git, CI/CD, Docker, Kubernetes, testing

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built **Python** and **FastAPI** server-side services for a multi-agent CRM platform serving 10,000+ users, routing requests across 40+ specialized agents with validated tool calls and tenant-aware access control
- Developed a customer-facing **JavaScript/TypeScript** and **React** workflow application for building and operating agent swarms, using Temporal and Redis for durable execution and real-time progress tracking
- Engineered a **FastMCP** service exposing 160+ secure backend actions, adding monitoring and typed validation to support reliable operations in a rapidly growing, dynamic setting
- Led delivery of GitHub Actions **CI/CD** pipelines and OpenTelemetry trace-based evaluations, improving release quality by detecting latency, accuracy, and safety regressions before production
- Automated code review with OpenAI Codex and a custom Bitbucket integration, triaging 25–30 pull requests weekly and reducing manual reviewer effort by several hours

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with PostgreSQL and Redis, handling secure uploads, downloads, and deletions across **AWS S3**, **Google Cloud Storage**, and MinIO through expiring signed URLs
- Improved enterprise application scale by optimizing PostgreSQL with window functions, materialized views, and indexes, then delivered interactive **JavaScript** and React visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions** and Lambda, improving fault recovery and eliminating timeout-prone execution paths across 100K+ weekly runs
- Applied **Computer Science Fundamentals** and quantitative analysis to production debugging, API design, automated testing, and cross-functional delivery of reliable backend and web systems

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed software engineering orchestrator that converts complex requests into dependency-aware task DAGs and executes them across multiple machines with retries, timeouts, and failure recovery
- Designed scripting and automation workflows for concurrent agents, combining typed interfaces, Git-based coordination, and observable execution to improve reliability at scale
