EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust
Frameworks: Spring Boot, FastAPI, LangChain, LangGraph, LangSmith, PyTorch, React, FastMCP
AI & LLMs: Generative AI, RAG Pipelines, LLM Fine-Tuning, Prompt Engineering, Vector Databases, Embedding Models, Hugging Face, OpenAI
Cloud & DevOps: Microsoft Azure, AWS (EC2, S3, Lambda, Step Functions), Docker, Kubernetes, CI/CD, Kafka
Databases: PostgreSQL (Vector Store), MongoDB, Redis

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Architected a multi-agent orchestration system using LangChain and LangGraph, enabling scalable asynchronous processing and reliable coordination across complex enterprise workflows - Developed an MCP AI interaction layer that translates natural-language intents into safe, validated tool calls across 1000+ microservices endpoints, automating high-performance backend actions - Optimized prompt routing and agent concurrency to maximize KV-cache hit rate, reducing end-to-end latency by 60% and lowering LLM API costs by 50% through efficient resource management	
AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
Conducted Fine-Tuning of Large Language Models (LLMs) and diffusion models using PyTorch and LORA on an HPC cluster; optimized inference with vLLM and Hugging Face for secure, efficient serving	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and built an internal support chatbot using LangChain and RAG with a PostgreSQL vector store, reducing ticket resolution time by 20% via natural language queries - Contributed to an Identity & Access Management platform using Java Spring Boot, React, and AWS, supporting thousands of users across 30+ applications within a Microservices Architecture - Developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis that handles secure file operations in AWS S3 and Google Cloud Storage via expiring signed URLs	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crosstern, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Orchestrates distributed AI agentic loops using Y-crdt for real-time synchronization, eliminating polling overhead and providing secure, event-driven execution across multiple machines
