EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust, Html/Css

Backend & Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Docker, Kubernetes, CI/CD, Git, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

Databases: PostgreSQL, Redis, MongoDB

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Designed, built, tested, and deployed a secure **identity platform**-adjacent **multi-agent** CRM system with **Python**, **FastAPI**, **LangGraph**, and **LangChain**, serving 10,000+ users through 40+ specialized sub-agents with tenant-aware access control
- Owned a **full-stack applications** surface in **React** Flow and **Typescript** from technical discovery through rollout, partnering with Product, Design, Security, and Operations to operate agentic swarms with reliable production support
- Built **GitHub** Actions **CI/CD pipelines** for cloud-native AI-agent deployments on **Docker** and **Kubernetes**, running OpenTelemetry trace-based evals to improve system reliability, performance, observability, latency, accuracy, and safety before production
- Created a **FastMCP** server exposing 160+ backend actions as secure, validated tool calls, enabling API-driven CRM workflow automation across multiple customers with monitoring and operational guardrails
- Integrated **OpenAI Codex** with a custom Bitbucket MCP server to automate daily PR triage across 25-30 PRs/week, improving developer experience and scaling thoughtful code reviews across engineering teams

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-native Storage Service in **Java**, **Spring Boot**, **PostgreSQL**, and **Redis** with secure APIs for uploads, downloads, and deletions across **S3**, Google Cloud Storage, and MinIO via expiring signed URLs
- Improved distributed systems scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then delivered interactive **React** visualizations that translated business problems for stakeholders
- Operated **AWS cloud infrastructure** with **Step Functions**, **Lambda**, **S3**, and **CloudWatch**, reducing Lambda timeouts and improving error recovery, testing, and operational support across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that decomposes complex technical problems into dependency-aware task DAGs and executes them across multi-machine agents with retries, timeout handling, and rollout-safe execution
- Implemented **TypeScript** control surfaces for API-oriented orchestration and operational visibility, reinforcing modern software architecture patterns for scalable, maintainable production systems
