EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, Java, Node.js/TypeScript, JavaScript, SQL, Bash, HTML/CSS
Backend & APIs: FastAPI, Spring Boot, REST APIs, HTTP, MCP servers, OAuth 2.0, OIDC, JWT
Cloud & Systems: AWS, Linux, Docker, Kubernetes, Git, GitHub Actions, CI/CD, networking concepts
Data & Frontend: PostgreSQL, Redis, MongoDB, React, React Flow
AI Engineering: OpenAI, Claude, LangGraph, LangChain, FastMCP, LlamaIndex, OpenTelemetry

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Built AI-driven security products, REST APIs, and MCP servers with Python, FastAPI, LangGraph, and FastMCP, routing requests across 40+ specialized agents for 10,000+ users with tenant-aware JWT access control - Developed a TypeScript and React Flow platform for customers to rapidly prototype, deploy, and monitor durable agentic workflows, using Temporal and Redis for resumable execution and live status - Created a production MCP server exposing 160+ validated backend actions with OAuth-compatible authorization patterns, structured schemas, monitoring, and defenses against unsafe tool calls - Shipped AI-native developer tooling by integrating OpenAI Codex with Bitbucket, automating triage across 25–30 pull requests/week and saving reviewers several hours - Built automated tests and GitHub Actions CI/CD quality gates with OpenTelemetry trace-based evaluations, catching latency, accuracy, and safety regressions before weekly production releases	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built a cloud-agnostic storage service using Java, Spring Boot, PostgreSQL, and Redis, delivering secure REST APIs for file operations across AWS S3, Google Cloud Storage, and MinIO via expiring signed URLs - Improved enterprise application performance by optimizing SQL window functions, materialized views, and indexes, then delivered interactive React visualizations for business stakeholders - Orchestrated resilient cloud jobs with AWS Step Functions and Lambda, improving failure recovery and reliability across 100K+ weekly executions	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript, Docker</i>	github.com/ozzyozbourne/dark-factory
Built a distributed AI coding-agent orchestrator that executes dependency-aware task DAGs across multiple machines with retries, timeout handling, automated testing, and failure recovery
