EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Backend & Frameworks: LangGraph, LangChain, FastMCP, LangSmith, Langfuse, FastAPI, React, Spring Boot

Others: Claude Code, OpenAI Agents SDK, Google ADK, LlamaIndex, CI/CD, Docker, Kubernetes, Git

Databases: PostgreSQL, Redis, MongoDB

AWS Services: Lambda, Step Functions, API Gateway, CloudWatch, CloudFormation, CloudFront, EC2, RDS, S3

Languages: Python, JavaScript/TypeScript, Java, Rust, Html/Css

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **multi-agent** CRM platform using **Python**, **LangGraph**, **LangChain** and **FastAPI**, serving 10,000+ users by routing requests across 40+ specialized sub-agents with secure access control and **agentic workflows** driven by **context-aware AI assistants**
- Built an **AI-assisted code review** pipeline integrating **OpenAI Codex** with a custom Bitbucket **MCP** server, automating daily PR triage across 25-30 PRs/week and reducing manual reviewer load by several hours
- Created a production **MCP** server with **FastMCP** that exposed 160+ backend actions to **AI assistants**, enabling internal copilots to access CRM workflows securely across multiple customers with built-in monitoring
- Built GitHub Actions **CI/CD** pipelines for AI-agent deployments, running OpenTelemetry trace-based **evaluation frameworks** and **developer productivity metrics** to improve release quality and flag latency, accuracy and safety issues before production
- Built **LlamaIndex**-powered **RAG** agents using OpenAI embeddings and **Pgvector** to answer product questions and generate ready-to-run **REST** API examples

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis** that handles file uploads, downloads, and deletions across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs
- Reduced query latency and improved scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data via interactive **React** visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents as reliable **agentic workflows** with retries, timeout handling, and failure recovery
- Added deterministic planning and execution controls so agent runs stay reliable under long-lived, multi-step coding tasks
