EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: *Python*, *SQL*, Java, JavaScript/TypeScript, Rust
Frameworks: FastAPI, PyTorch, FastMCP, LangGraph, LangChain, LangSmith, React, Spring Boot
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Databases: *PostgreSQL*, MongoDB, Redis
Others: *Systems Engineering*, *Data Analysis*, *Test Planning*, Git, CI/CD, Kafka, Node.js

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
• Took end-to-end ownership of an MCP AI interaction layer, defining system requirements and acceptance criteria to translate natural-language intents into validated tool calls across 1000+ platform endpoints • Executed data analysis in Python to triage interaction failures and optimize prompt routing, reducing latency by 60% and lowering LLM costs by 50% through targeted KV-cache hit rate improvements • Architected a concurrent multi-agent system using LangChain and LangGraph, managing ambiguity through robust trriage and establishing a system-level observability layer using LangSmith for tracing	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
• Conducted research on integrated hardware and software using StyleGAN and Stable Diffusion on an HPC cluster, performing trriage and debug of large-scale training runs • Utilized Python for data analysis and model characterization to optimize PyTorch and LORA fine-tuning workflows, ensuring high-quality model serving via vLLM and Hugging Face	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
• Designed and developed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis, defining testable feature requirements for file operations across S3, GCS, and MinIO • Performed problem definition and root-cause analysis on production data to trriage failures in long-running data import jobs, implementing AWS Step Functions to resolve Lambda timeout issues	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
• Engineered a system-level orchestrator for CLI IO via PTY, implementing real-time command validation and logging to ensure secure, event-driven agentic loops across distributed machines
