EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust, Html/Css
Backend & Frameworks: FastAPI, React, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse
Databases: PostgreSQL, MongoDB, Redis
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Owned and built a multi-agent CRM platform end-to-end using Python, FastAPI, and LangGraph, serving 10,000+ users — iterating rapidly on routing logic and agent schemas through tight customer-feedback loops to drive continuous product improvement across 40+ specialized sub-agents - Engineered a MCP server with FastMCP exposing 160+ Python backend actions as LLM-callable tools, investing in developer experience by reducing workflow-wiring time and providing built-in monitoring and tenant-aware access control across multiple customers - Owned full product feature development of a React Flow and TypeScript visual workflow platform enabling users to create, run, and manage agentic swarms end-to-end, using Temporal for durable and resumable execution - Built GitHub Actions CI/CD pipelines with OpenTelemetry trace-based evals gating every deployment — scoring latency, accuracy, and safety regressions before production to enable rapid prototyping without sacrificing release quality - Designed an agentic code review pipeline integrating OpenAI Codex with a custom Bitbucket MCP server, automating daily PR triage across 25–30 PRs/week and significantly reducing manual reviewer load to improve team velocity	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed and owned a cloud-agnostic Storage Service in Java and Spring Boot with PostgreSQL and Redis that handles file uploads, downloads, and deletions across Google Cloud Storage, S3, and MinIO via expiring signed URLs - Reduced query latency and improved scalability by optimizing PostgreSQL with window functions, materialized views, and indexes, then exposed the data via interactive React visualizations for business stakeholders - Orchestrated long-running jobs with AWS Step Functions, eliminating AWS Lambda timeouts and improving error recovery across 100K+ weekly executions	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling
