EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages & Data: Python, Java, TypeScript/JavaScript, SQL, PostgreSQL, Redis, MongoDB

Computer Science: Object-oriented design, data structures, algorithms, complexity analysis, system design

Backend & APIs: Backend development, REST API development and integration, FastAPI, Spring Boot, microservices

Distributed Systems: Large-scale distributed systems, scalable and resilient architecture, production debugging and monitoring

DevOps & Cloud: Software Development Lifecycle, AWS, Docker, Kubernetes, GitHub Actions CI/CD, OpenTelemetry

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Designed, developed, and tested **backend services and APIs** in Python and FastAPI, routing requests across 40+ distributed components for 10,000+ users with secure access control
- Built scalable and resilient workflow architecture with Temporal and Redis, supporting high-concurrency execution, retries, resumability, and live progress across production systems
- Developed a production MCP service exposing 160+ validated backend actions, integrating clean APIs into a fully functional multi-tenant software system with structured error handling
- Solved production reliability issues through **debugging and monitoring** with OpenTelemetry traces, then built GitHub Actions CI/CD gates to prevent latency, accuracy, and safety regressions
- Collaborated across engineering and product workflows to launch an OpenAI Codex/Bitbucket integration that automated 25-30 pull-request reviews/week and improved engineering productivity

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed and launched a Java/Spring Boot backend with PostgreSQL and Redis, developing and integrating secure REST APIs across AWS S3, Google Cloud Storage, and MinIO
- Improved service scalability and performance through SQL window functions, materialized views, indexes, and object-oriented component design
- Operated large-scale distributed workflows with AWS Step Functions and Lambda, improving production timeout handling and error recovery across **100K+ weekly executions**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript, Docker*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent platform that executes dependency-aware task DAGs across machines with scheduling algorithms, concurrency controls, retries, monitoring, and failure recovery
