EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, Rust, Html/Css

Backend & Frameworks: Spring Boot, FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, Redis, MongoDB

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Built a **multi-agent** CRM platform in **Python**, **FastAPI**, **LangGraph**, and **LangChain** for **10,000+** users, routing requests across **40+** **specialized sub-agents** as a **web-scale data system** while partnering with **Product and Design** to deliver **end-to-end features** with tenant-aware access control
- Owned **architecture design meetings** for a **React Flow** and **TypeScript** workflow builder that let users create, run, and manage agent swarms, using **Temporal** for durable, resumable execution behind a **high availability** control plane
- Built an agentic **code reviews** pipeline integrating **OpenAI Codex** with a custom **Bitbucket MCP** server, automating daily PR triage across **25-30 PRs/week** and reducing manual reviewer load by several hours
- Created a **FastMCP** server exposing **160+** **backend actions** to AI agents, giving internal teams secure access to operational workflows and tightening observability with built-in monitoring
- Built GitHub Actions **CI/CD** pipelines for AI-agent deployments, running OpenTelemetry trace-based evals to catch latency, accuracy, and safety regressions before production and strengthening **cross-team collaboration** across engineering, product, and operations

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **PostgreSQL** and **Redis**, turning **SQL** and **NoSQL** data stores into one backend surface across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs and reinforcing backend work in **managed languages**
- Reduced query latency and improved scalability by optimizing **PostgreSQL** with window functions, materialized views, and indexes, then exposed the data through interactive **React** visualizations for business stakeholders
- Orchestrated long-running jobs with **AWS Step Functions**, reducing **AWS Lambda** timeouts and improving error recovery across **100K+** weekly executions while maintaining **high throughput** and **high availability**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries, timeout handling, and real-time status updates
- Used **open source technologies** to coordinate fast feedback loops for continuous integration workflows, keeping distributed work visible and recoverable under load
