EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Java 21, Rust, JavaScript/TypeScript, Python
Frameworks: Spring Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, React
Databases: PostgreSQL, MongoDB, Redis
Others: Kafka, Docker, Kubernetes, CI/CD, Git, Node.js, Google Cloud
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Engineered an MCP interaction layer to translate natural-language intents into safe, validated tool calls across 1000+ platform endpoints, leading end-to-end customer implementations and automated workflows - Developed generative code solutions and API-aware templates to accelerate customer-specific integrations with core platform APIs, ensuring high engineering standards and robust distributed systems architecture - Built a comprehensive observability layer using Langfuse and LangSmith for tracing, structured logs, and debugging to surface architectural and data quality risks before they impact production environments - Architected concurrent multi-agent systems using LangChain and LangGraph, optimizing for reliability and low latency (60% reduction) while owning the full technical arc from discovery to post-launch	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Fine-tuned industry-standard models using CUDA, PyTorch, and LORA on an HPC cluster, managing the technical lifecycle of high-performance distributed systems and model training - Deployed models with vLLM and Hugging Face, translating complex research into production-grade features and leading workshops on GPU programming and AI Agents for 50+ students	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic Storage Service using Python, PostgreSQL, and Redis to handle data migrations and structured content onboarding across AWS S3, Google Cloud Storage, and MinIO - Contributed to a core Identity & Access Management platform using React, Spring Boot (Java 21), and AWS, supporting thousands of users while ensuring security, compliance, and stability - Built backend data pipelines and workflows using AWS Step Functions to manage long-running ETL jobs and ensure reliable data infrastructure for mission-critical applications	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Built a distributed PTY-based orchestrator that enables secure, auditable command execution and real-time event-driven updates, reflecting deep debugging prowess across full-stack systems - Utilized Y-crdt for machine-to-machine signaling, demonstrating a strong grasp of concurrency, distributed data structures, and robust technical delivery of complex developer tooling
