EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Html/Css, Java, Python, Rust
Backend & Frameworks: React, FastAPI, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse
Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code
Databases: PostgreSQL, MongoDB, Redis
AWS Services: API Gateway, CloudFront, S3, Lambda, EC2, RDS, CloudWatch, Step Functions, CloudFormation

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Designed and delivered a reusable visual workflow application with React Flow, JavaScript/TypeScript, HTML/CSS, and event-driven UI modules, enabling 10,000+ users to manage agentic workflows through consistent, accessible interactions (WCAG/ARIA) - Drove REST API design between the web application and FastAPI services, exposing 160+ validated backend actions through FastMCP with secure access control and monitoring for maintainable, large-scale deployment - Rapidly prototyped and shipped user-focused React workflows backed by durable Temporal execution and Redis progress tracking, supporting incremental modernization and collaborating with a cross-functional team through agile development processes - Conducted automated code reviews through an OpenAI Codex and Bitbucket MCP pipeline, triaging 25–30 PRs/week, while building GitHub Actions CI/CD quality gates that evaluate latency, accuracy, and safety before production - Built LlamaIndex-powered RAG interfaces with OpenAI embeddings and Pgvector that translate product questions into contextual answers and ready-to-run REST API examples, applying LLM technologies to improve user workflows	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Developed maintainable, cross-browser web workflows with React, JavaScript, HTML, DOM, and CSS, transforming optimized PostgreSQL data into interactive visualizations with reusable UI patterns designed for internationalization - Designed an object-oriented Java and Spring Boot Storage Service using JSON and REST interfaces, PostgreSQL, and Redis to manage uploads, downloads, and deletions across Google Cloud Storage, S3, and MinIO via expiring signed URLs - Orchestrated deployment-ready, long-running jobs with AWS Step Functions and Lambda, improving cross-service error recovery and reliability across 100K+ weekly executions	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
- Built a reusable TypeScript web orchestration workflow that decomposes coding requests into dependency-aware task DAGs and coordinates multi-machine agents with retries and timeout handling - Applied modular software design, Git-based development, and incremental integration patterns to keep distributed workflows maintainable while rapidly prototyping new concepts
