PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Develop production code for a SaaS application interaction layer translating natural-language intents into reliable, performant API calls across 1000+ endpoints - Architect highly scalable distributed systems using LangChain and LangGraph for concurrent orchestration, optimizing for loosely-coupled system behavior - Collaborate with ML and Infra teams to develop API specifications and architectures for generative SDK patterns and code-generation workflows - Enhance reliability through observability (Langfuse, LangSmith), implementing instrumentation and structured logs to monitor performance (60% latency reduction)	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
Developed SaaS-ready models using PyTorch and LORA, with focus on algorithmic efficiency and complexity analysis on an HPC cluster	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a highly scalable storage service for a SaaS platform using Python, PostgreSQL, and Redis, handling file operations across S3 and MinIO - Developed reliable backend workflows using AWS Step Functions and Kafka to manage long-running jobs, ensuring system robustness	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Engineered a highly performant PTY orchestrator for distributed environments, utilizing Y-crdt to signal state and eliminate polling overhead
