EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust, Html/Css
Backend & Frameworks: FastAPI, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse, Spring Boot
Others: OpenAI Agents SDK, Google ADK, LlamaIndex, Claude Code, Docker, Kubernetes, Git, CI/CD
Databases: PostgreSQL, Redis, MongoDB
AWS Services: Step Functions, Lambda, API Gateway, CloudWatch, S3, EC2, RDS, CloudFormation, CloudFront

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Built the orchestration layer for a real-time multi-agent CRM platform with Python, FastAPI, LangGraph, and LangChain, routing requests across 40+ specialized agents with tenant-aware access control for 10,000+ users - Shipped full-stack features for a TypeScript, Node, and React visual workflow platform, sequencing agentic swarms with Temporal durable execution, persisted state, retries, and failure recovery - Extended agent harnesses with GitHub Actions CI/CD and OpenTelemetry trace-based eval loops, testing latency, accuracy, and safety before agent-improvement changes reached production - Built a FastMCP server exposing 160+ validated backend actions and an OpenAI Codex review pipeline that automated 25-30 PRs/week with safe tool calls, guardrails, monitoring, and human-in-the-loop checkpoints	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Orchestrated long-running distributed systems workflows with AWS Step Functions, reducing AWS Lambda timeouts and strengthening retries, rollback paths, and error recovery across 100K+ weekly executions - Designed a cloud-agnostic Storage Service in Java, Spring Boot, PostgreSQL, and Redis for uploads, downloads, and deletions across Google Cloud Storage, S3, and MinIO through expiring signed URLs - Optimized PostgreSQL with window functions, materialized views, and indexes to reduce query latency, then shipped interactive React visualizations that exposed operational data to business stakeholders	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
- Built a distributed coding-agent orchestrator that decomposes large requests into dependency-aware task DAGs and coordinates state across multi-machine agents with retries and timeout handling - Designed execution safeguards for concurrent agent workflows, including dependency sequencing, failure isolation, and resumable task execution across customer-like environments
