EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, Rust
Databases: PostgreSQL, MongoDB, Redis
Frameworks: React, Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
Others: Node.js, Git, CI/CD, Google Cloud, Kafka
AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Took end-to-end ownership (requirements gathering, architecture, implementation, deployment, and maintenance) of an MCP interaction layer that converts natural-language requests into safe, validated tool calls across 1000+ platform endpoints, improving reliability of business-critical software systems - Built reusable integration accelerators (API-aware templates, SDK patterns, code-generation workflows), served as a technical liaison for changing customer requirements, and standardized REST APIs for internal reporting systems and work order tickets	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Delivered full lifecycle model work (data prep, training, evaluation, deployment) using StyleGAN, Stable Diffusion, CUDA, PyTorch, and LoRA on Pace University's HPC cluster with reproducible documentation - Mentored 50+ students through workshops on GPU programming (CUDA, Mojo) and AI agent engineering (LangChain, LangGraph, LangSmith), translating complex concepts into actionable implementation steps	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built an internal support chatbot with LangChain and RAG on PostgreSQL for natural-language retrieval, reducing average ticket resolution time by 20% for day-to-day support queues - Contributed to an Identity & Access Management platform using React, Spring Boot, and AWS, supporting thousands of users across 30+ applications with secure, role-aware access	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crosstern, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Implemented full PTY command ownership with pre-execution validation and audit logging for safer execution and predictable debugging - Built distributed orchestration loops with Y-crdt and event-driven broadcasting for real-time updates, eliminating polling overhead while improving observability across machines
