EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i> <i>Availability: Able to commit to an onboarding date by end of year 2026.</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Rust, Java, Html/Css
Backend & Frameworks: FastAPI, React, Spring Boot, LangGraph, LangChain, FastMCP, LangSmith, Langfuse
Databases: PostgreSQL, MongoDB, Redis
Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code
AWS Services: S3, Lambda, Step Functions, EC2, RDS, CloudWatch, CloudFormation, CloudFront, API Gateway

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - Present</i>
- Built a datacenter network management automation style CRM control plane in Python, FastAPI, LangGraph, and LangChain, routing 10,000+ users across 40+ specialized sub-agents with secure access control for high availability, scalability, and high-performance delivery - Built platform products and tooling services in React Flow, TypeScript, HTML, and CSS for network planning, deployment, change, verification, and analytics capabilities, improving network delivery efficiency and stability with durable automated changes development - Built an agentic Code Review pipeline integrating OpenAI Codex with a custom Bitbucket MCP server, automating 25-30 PRs/week with strict code and design quality gates that reduced manual reviewer load by several hours - Created a FastMCP tooling service exposing 160+ backend actions to AI agents, turning intent-based requests into validated management and control protocols for monitored lifecycle automation across multiple customers - Built GitHub Actions CI/CD pipelines for AI-agent deployments, running OpenTelemetry trace-based evals to flag latency, accuracy, and safety issues before production and improve release stability	
Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Designed a cloud-agnostic Storage Service in Java and Spring Boot with PostgreSQL and Redis, handling uploads, downloads, and deletions across S3, Google Cloud Storage, and MinIO while troubleshooting TCP/IP, DNS, and ARP network paths - Reduced query latency and improved scalability through SQL and NoSQL database programming and optimization in PostgreSQL and Redis, using window functions, materialized views, indexes, and React analytics - Orchestrated long-running backend jobs with AWS Step Functions and AWS Lambda, reducing timeouts and improving error recovery across 100K+ weekly executions for high-performance operational workflows	

PROJECTS

Dark Factory - orchestrator for PI agent <i>Elixir, TypeScript</i>	github.com/ozzyozbourne/dark-factory
Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs, executes them across multi-machine AI agents, and applies retries, timeout handling, and verification gates
