EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Backend & Frameworks: Spring Boot, React, FastAPI, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Languages: Java, JavaScript/TypeScript, Python, Html/Css, Rust

Databases: PostgreSQL, MongoDB, Redis

AWS Services: EC2, RDS, S3, Lambda, CloudWatch, Step Functions, CloudFormation, CloudFront, API Gateway

Others: Git, CI/CD, Docker, Kubernetes, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Built a **customer-facing** multi-agent CRM platform in **Python**, **FastAPI**, **LangGraph**, and **LangChain** that delivered **scalable full-stack applications** for 10,000+ users, routing requests across 40+ specialized sub-agents with tenant-aware access control, **application security best practices**, and secure tool gating across every agent
- Shipped a **React** and **TypeScript** visual workflow builder with **HTML** and **CSS** components, creating responsive and reusable frontend applications and reusable component libraries for agentic swarms with durable and resumable execution
- Built an **OpenAI Codex** code-review pipeline with a custom Bitbucket **MCP** server and **AI-powered developer tools**, automating PR triage across 25-30 PRs/week and reducing manual reviewer load while promoting clean, maintainable, well-tested code through autonomous agents, coding assistants, and coding copilots
- Created a **FastMCP** service exposing 160+ backend actions with built-in **monitoring**, logging-friendly **OpenTelemetry** instrumentation, and auditable execution traces, giving agents safe access to multi-tenant CRM workflows and durable fixes for production issues
- Added live progress tracking for long-running workflows with **Redis** as distributed caching, and wired GitHub Actions **CI/CD** pipelines with automated testing across unit, integration, and end-to-end testing frameworks to flag latency, accuracy, and safety regressions before production and speed debugging

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with relational and NoSQL databases such as **PostgreSQL** and **Redis**, exposing **RESTful APIs** and applying distributed systems patterns for uploads, downloads, and deletions across cloud platforms such as **AWS S3**, Google Cloud Storage, and MinIO via expiring signed URLs and secure access controls, while driving technical design discussions, architecture decisions, object-oriented design, software architecture, and design patterns
- Reduced query latency and improved scalability by tuning **PostgreSQL** with window functions, materialized views, and indexes for large datasets, then exposed the data through interactive **React** dashboards for business stakeholders
- Orchestrated long-running jobs with AWS Step Functions for asynchronous processing, reducing AWS Lambda timeouts and improving error recovery across 100K+ weekly executions while strengthening high availability, observability, root-cause analysis, and cloud-native application development

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator for large-scale **AI** development requests, applying **data structures**, **algorithms**, and **system design** to break work into dependency-aware task DAGs and execute them across multi-machine agents with retries, timeout handling, and agent-based workflows
