EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Databases: PostgreSQL, MongoDB, Redis
AWS Services: RDS, CloudWatch, Lambda, S3, EC2, Step Functions, CloudFormation, CloudFront, API Gateway
Languages: Python, Java, JavaScript/TypeScript, Rust
Others: Git, CI/CD, Node.js, Google Cloud, Kafka
Frameworks: React, Sprint Boot, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch
AI: Claude code, Codex, Pi coding-agent

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Developed an MCP interaction layer translating natural-language into validated tool calls across 1000+ endpoints, enabling automated customer actions and proactive root cause identification - Architected an observability layer using Langfuse and LangSmith for tracing and structured logs to troubleshoot agentic workflows and monitor real-time application performance - Built generative code solutions (API-aware templates) to accelerate integration with platform APIs, ensuring high logic fidelity and reducing troubleshooting overhead for external developers - Orchestrated multi-agent systems using LangChain and LangGraph, optimizing routing to reduce latency by 60% and improve query performance and reliability for automated actions	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built a support chatbot using LangChain, RAG, and PostgreSQL, reducing ticket resolution time by 20% by enabling natural language queries for root cause identification - Designed a cloud storage service using Python and PostgreSQL to handle complex SQL queries for data validation and analysis across S3, GCS, and MinIO - Contributed to an IAM platform using React, Spring Boot, and AWS RDS, managing large datasets and implementing stored procedures and logic for 30+ applications	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Research on StyleGAN and Stable Diffusion using PyTorch and CUDA, leveraging HPC clusters to analyze and validate model training for industry fashion designs - Led technical workshops for +50 students on AI Agents and GPU programming, demonstrating strong communication skills in explaining complex system behaviors	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- CLI orchestrator that troubleshoots and validates commands via PTY logging, ensuring secure shell execution - Utilized Y-crdt for real-time state synchronization, providing high-fidelity observability of agentic loops
