EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Development Languages: *Java/J2EE*, *JavaScript*, TypeScript, Python, C/C++, HTML, JSP, XML, SQL, .Net

Data & Storage: *PostgreSQL*, Redis, data manipulation languages, data modeling principles, S3, Google Cloud Storage, MinIO

Engineering Practices: *test-driven development*, Agile, Waterfall, software development methodologies, specifications, code reviews, Git, CI/CD, Windows, UNIX

AI-Assisted Development: *GitHub Copilot*, *Claude Code*, *Codex*, Gemini, agentic software development tools, code generation, testing, debugging, documentation

PROFESSIONAL EXPERIENCE

Software Engineer

Sperse

Phoenix, AZ

Feb 2026 - Present

- Implemented and reviewed system components for a 10,000+ user CRM in **Python**, **JavaScript/TypeScript**, React, and FastAPI, translating detailed specifications into maintainable code across 40+ specialized agents
- Applied **AI-assisted and agentic development tools** through a **Codex** and Bitbucket MCP code-review pipeline, accelerating testing, debugging, documentation, and triage for 25-30 PRs/week while validating AI-generated code for correctness, quality, security, and maintainability
- Built a test-driven **FastMCP** service exposing 160+ validated backend actions (typed schemas, access controls, and monitoring), completing bug fixes and resolving technical issues through collaborative code reviews
- Delivered GitHub Actions **CI/CD** pipelines and OpenTelemetry trace-based tests for Agile releases, evaluating latency, accuracy, and safety before production while continuously adopting emerging AI development tools and practices

Software Engineer

Qualitest

Noida, India

Feb 2021 - Dec 2023

- Developed a **Java/J2EE** and Spring Boot storage subsystem with PostgreSQL and Redis, implementing file operations across **Google Cloud Storage**, **S3**, and **MinIO** through expiring signed URLs
- Applied **SQL** data manipulation and data modeling principles (window functions, materialized views, indexes) to reduce query latency, then delivered **JavaScript** and HTML React visualizations for business stakeholders
- Operated across **Agile** development environments with engineers and stakeholders, writing portions of detailed specifications, implementing coding best practices, reviewing code, and resolving defects across 100K+ weekly AWS Step Functions executions

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built an AI-first distributed coding-agent orchestrator that converts specifications into dependency-aware task DAGs, generates and refines code across multiple machines, and handles retries and timeouts
- Used agentic workflows to test and debug generated changes while applying sound software engineering practices, preserving reviewable execution histories for technical communication and validation
