Dear Hiring Team,

It is with great enthusiasm that I submit my candidacy for the AI Solutions Engineer (full-stack developer) role with Edelman. I bring over three years of software engineering experience building AI-native products, alongside a Master of Science in Computer Science from Pace University.

In my current role at Sperse, I build full-stack AI applications with React, JavaScript/TypeScript, and Python, integrating OpenAI APIs and other LLM APIs into typed backend APIs and reusable application workflows across 1,000+ platform endpoints. I also implemented observability and orchestration using Langfuse, LangSmith, LangChain, and LangGraph for debug, test, and documentation workflows, improving runtime performance, reliability, and usability while reducing latency by 60% and LLM API costs by 50%. This directly aligns with your team's need to ship rapid prototypes and production-ready AI applications with strong engineering rigor.

At Qualitest, I built an internal LangChain + RAG support chatbot with PostgreSQL vector retrieval that reduced average ticket resolution time by 20%, and I designed cloud-agnostic storage and IAM services spanning AWS, S3, Google Cloud Storage, MinIO, Step Functions, and Lambda. These projects strengthened my hands-on experience with authentication, database management, serverless backend patterns, and operationally reliable APIs. In parallel, my AI research work at Pace strengthened my prompt engineering depth and my ability to communicate complex ideas clearly through workshops on AI agents and GPU systems.

Edelman's mission to help organizations earn trust through data, innovation, and creativity is exactly the kind of work I want to advance. I am especially energized by your focus on responsible AI communication and by values like bold thinking and curiosity, which mirror how I build and collaborate with cross-functional teams.

I would welcome the opportunity to contribute to Edelman's AI-driven product development and help deliver trustworthy, high-impact AI solutions for clients. I can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com. Thank you for your consideration.

Sincerely,
Osaid Khan
