EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, Rust
Frameworks: React, FastAPI, FastMCP, LangGraph, LangChain, LangSmith, PyTorch, Sprint Boot
Databases: PostgreSQL, Redis, MongoDB
AWS Services: Lambda, API Gateway, Step Functions, CloudWatch, EC2, RDS, S3, CloudFormation, CloudFront
AI: Codex, Claude code, Pi coding-agent
Others: Git, CI/CD, Node.js, Kafka, Google Cloud

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Built full-stack AI applications with React, JavaScript/TypeScript, and Python, integrating OpenAI APIs and other LLM APIs into typed backend APIs and reusable application workflows across 1000+ platform endpoints. - Implemented observability and orchestration with Langfuse, LangSmith, LangChain, and LangGraph for debug, test, and document workflows, improving runtime performance, reliability, and usability while reducing latency by 60% and LLM API costs by 50%.	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted applied research on StyleGAN and Stable Diffusion with CUDA, PyTorch, and LoRA on Pace University's HPC cluster, delivering rapid prototypes and strengthening prompt engineering for production-like evaluation. - Optimized serving with vLLM and Hugging Face and led workshops for +50 students on GPU programming and AI agents development with LangChain, LangGraph, and LangSmith.	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built an internal support chatbot using LangChain and RAG with PostgreSQL vector retrieval, reducing average ticket resolution time by 20%. - Designed a cloud-agnostic storage service with Python, PostgreSQL, and Redis across Google Cloud Storage, S3, and MinIO using signed URLs, and contributed to IAM services with React, Spring Boot, and AWS for 30+ applications, strengthening authentication and secrets management. - Built serverless backend patterns with AWS Step Functions and AWS Lambda for resilient long-running imports, retries, and dependable database management and service-to-service APIs.	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
- Engineered a CLI orchestrator with full PTY ownership, command validation gates, and evented logs to improve agent-loop safety, runtime control, and developer usability. - Implemented distributed workflow automation with Y-crdt for real-time multi-session agent loops, using collaborative Git and GitHub workflows plus AI coding tools (Cursor, v0, Codex, Claude Code) to accelerate delivery.
