EDUCATION

Pace University

Master of Science (MS) in Computer Science (GPA - 4.0/4.0)

New York City, NY

Jan 2024 - Dec 2025

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology (B.Tech) in Computer Science

Noida, India

Jul 2016 - Sep 2020

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, Rust, Html/Css

Backend & Frameworks: FastAPI, Spring Boot, React, LangGraph, LangChain, FastMCP, LangSmith, Langfuse

Databases: PostgreSQL, MongoDB, Redis

Others: CI/CD, Docker, Kubernetes, Git, Google ADK, OpenAI Agents SDK, LlamaIndex, Claude Code

AWS Services: Lambda, S3, API Gateway, EC2, RDS, CloudWatch, Step Functions, CloudFormation, CloudFront

PROFESSIONAL EXPERIENCE

Software Engineer

Phoenix, AZ

Sperse

Feb 2026 - Present

- Collaborated across **Agile teams** to design and own **backend to frontend** features for production **AI experiences** using **open-source frameworks (Python, FastAPI, React)** and **TypeScript** plus **Node.js** patterns, routing 10,000+ users across 40+ specialized sub-agents with secure access control
- Built a **React Flow** and **TypeScript** visual workflow platform for users to create, run, and manage agentic swarms, using **Temporal** for durable, resumable execution and **Redis** progress tracking across long-running workflows
- Created a **FastMCP** server exposing 160+ backend actions as safe, validated tool calls, integrating **enterprise applications** and **enterprise systems** with tenant-aware security, built-in monitoring, and reliable CRM workflow automation
- Built GitHub Actions **CI/CD** and **DevOps pipelines** for AI-agent releases on **cloud infrastructure** using **Container Orchestration services including Docker and Kubernetes**, running OpenTelemetry trace-based **test strategies** and **security scanning** before **production environments**
- Built **LlamaIndex**-powered **RAG** agents using OpenAI embeddings and **Pgvector** to answer product questions and generate ready-to-run **REST API** examples for **Java, Node, Python, and Go** consumers

Software Engineer

Noida, India

Qualitest

Feb 2021 - Dec 2023

- Designed a cloud-agnostic Storage Service in **Java** and **Spring Boot** with **Open Source RDBMS (PostgreSQL)** and **NoSQL databases (Redis)**, handling uploads, downloads, and deletions across **S3**, Google Cloud Storage, and MinIO via expiring signed URLs
- Translated **business requirements** and **functional specifications** into **technical designs** for data workflows, optimizing **PostgreSQL** with window functions, materialized views, and indexes before exposing results through **React** visualizations for product, data, and platform stakeholders
- Orchestrated long-running jobs with **AWS Step Functions** and **Lambda**, reducing timeouts and improving error recovery across **100K+** weekly executions with cloud patterns relevant to **Azure tools and services, cloud-based solutions**, and a **large production environment hosted in Azure**

PROJECTS

Dark Factory - orchestrator for PI agent | *Elixir, TypeScript*

github.com/ozzyozbourne/dark-factory

- Built a distributed coding-agent orchestrator that breaks large coding requests into dependency-aware task DAGs and executes them across multi-machine AI agents with retries and timeout handling for **scalable technical solutions** and **high-performance use cases**
- Designed **full-stack development tools and technologies** around TypeScript orchestration surfaces and Elixir workers, shaping **future architecture** patterns for scalable downstream automation
