EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Rust, Java
Frameworks: React, Node.js, FastAPI, LangGraph, LangChain, Sprint Boot
AWS Services: Lambda, IAM, EC2, RDS, S3, CloudWatch, Step Functions, CloudFormation, API Gateway
Databases: PostgreSQL, Redis, MongoDB
Others: Terraform, CI/CD, Claude code, Git, Kafka, Google Cloud

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
- Designed and shipped full-stack features using TypeScript across React frontends and Lambda backends, owning the full production lifecycle including CI/CD, observability, and post-deploy validation - Built an MCP AI interaction layer using Claude Code and agentic coding tools, contributing to the team's AI context library and process improvements to accelerate feature delivery and code quality - Architected event-driven systems on AWS using Lambda, IAM, and networking configurations, utilizing Terraform to spin up and manage production infrastructure for scalable customer actions - Enabled a robust observability layer for performance monitoring using Langfuse and LangSmith to trace TypeScript execution, debug failures, and ensure high reliability of production systems - Optimized Node.js runtime performance and agent concurrency to reduce end-to-end latency by 60% and lower infrastructure costs by 50% while maintaining strict security via IAM policies	

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
- Conducted research on AI Agents using LangChain and LangGraph, developing prototypes that leverage Python and TypeScript for advanced data modeling and autonomous task execution - Utilized vLLM and Hugging Face for efficient model inference, ensuring secure and performant model serving for analytics and natural language intent recognition - Conducted workshops on building AI Agents and agentic coding workflows for +50 students, focusing on Claude code and comparable developer productivity tools	

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
- Built analytics and BI support tools using LangChain and RAG with PostgreSQL vector stores, enabling drill-down capabilities over technical documentation to reduce ticket resolution time by 20% - Designed a cloud-native Storage Service on AWS using Python, PostgreSQL, and S3, managing complex IAM roles and networking to handle secure file operations via expiring signed URLs - Contributed to an Identity & Access Management platform using React, Spring Boot, and AWS Lambda, supporting thousands of users across 30+ applications with focus on API security and data modeling - Developed backend workflows using AWS Step Functions and Event-Driven architectures to handle long-running data import jobs for warehouses, preventing Lambda timeouts and ensuring data integrity	

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>TypeScript, PTY, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
Built a Claude Code inspired orchestrator that enables full ownership of CLI IO via PTY, automating CI/CD tasks and AWS infrastructure validation loops	

- Provides **event-driven** agentic loops that broadcast **real-time** updates, eliminating polling overhead for complex distributed system monitoring and analytics
