EDUCATION

Pace University <i>Master of Science (MS) in Computer Science (GPA - 4.0/4.0)</i>	New York City, NY <i>Jan 2024 - Dec 2025</i>
Dr. A.P.J. Abdul Kalam Technical University <i>Bachelor of Technology (B.Tech) in Computer Science</i>	Noida, India <i>Jul 2016 - Sep 2020</i>

TECHNICAL SKILLS

Frameworks: LangChain, LangGraph, LangSmith, PyTorch, FastAPI, FastMCP, React, Sprint Boot
Languages: Python, JavaScript/TypeScript, Java, Rust
Databases: PostgreSQL, Redis, MongoDB
AWS Services: Step Functions, Lambda, API Gateway, CloudWatch, S3, EC2, RDS, CloudFormation, CloudFront
AI: Claude code, Codex, Pi coding-agent
Others: Google Cloud, Git, CI/CD, Kafka, Node.js

PROFESSIONAL EXPERIENCE

Software Engineer Sperse	Phoenix, AZ <i>Feb 2026 - present</i>
------------------------------------	--

- Architected **autonomous AI agents** with **LangChain** and **LangGraph** using **stateful, graph-based agent workflows** (planner, executor, tool memory) to orchestrate external **APIs** across **1000+ platform endpoints**
- Implemented **decision-making logic** and **action execution components** that turn natural-language requests into **safe, validated tool calls** with guardrails for **edge cases** and rollback paths
- Optimized **performance, scalability, and robustness** through routing and concurrency controls, reducing latency by **60%** and LLM API cost by **50%**; instrumented **LangSmith** and **Langfuse** for offline **evaluations** and **safety protocols**

AI Researcher Pace Artificial Intelligence Lab	New York City, NY <i>Sep 2025 - Dec 2025</i>
--	---

- Developed and trained **machine learning models** with **PyTorch**, **CUDA**, **StyleGAN**, and **Stable Diffusion** (LoRA on an **HPC cluster**) to improve generation quality and adaptation speed
- Ran **experiments, simulations, and evaluations** on Pace University's HPC cluster, benchmarking inference with **vLLM** and deployment via **Hugging Face**
- Documented methods for **reproducibility** and led workshops for **50+** students on GPU programming and **AI agents** with **LangChain**, **LangGraph**, and **LangSmith**

Software Engineer Qualitest	Noida, India <i>Feb 2021 - Dec 2023</i>
---------------------------------------	--

- Built an internal support chatbot using **LangChain** and **RAG** with **PostgreSQL** vector retrieval, reducing ticket resolution time by **20%**
- Designed a cloud-agnostic Storage Service with **Python**, **PostgreSQL**, and **Redis** across **Google Cloud Storage**, **S3**, and **MinIO** via expiring signed URLs
- Developed workflows with **AWS Step Functions** and **AWS Lambda** for long-running imports, stronger failure handling, and operational resilience

PROJECTS

Dark Factory - Orchestrator for AI coding CLIs <i>Crossterm, Ratatui, Y-crdt</i>	github.com/ozzyozbourne/dark-factory
• Built an orchestrator that owns CLI PTY I/O and validates commands before execution, improving safe automation for agent-driven development loops • Implemented event-driven synchronization with Y-crdt for distributed, real-time AI agent collaboration across machines without polling
