Dear Hiring Team,

It is with great pleasure that I submit my candidacy for the AI Developer role with American Technology Consulting. I bring over three years of professional experience building production AI systems, along with a Master of Science in Computer Science from Pace University.

In my current Software Engineer role at Sperse, I design and deploy autonomous AI agents using LangChain and LangGraph with stateful, graph-based agent workflows across 1000+ platform endpoints. I build decision-making logic and action execution components that convert natural-language requests into safe, validated tool calls, then optimize performance, scalability, and robustness through routing and concurrency controls that reduced latency by 60% and LLM API cost by 50%. I also instrument LangSmith and Langfuse to run evaluations, debug complex failures, and enforce safety protocols while integrating agents with external APIs.

My prior experience and research map directly to your core responsibilities around model development, experimentation, and collaboration. At Pace Artificial Intelligence Lab, I developed machine learning models with PyTorch, CUDA, StyleGAN, and Stable Diffusion, ran experiments and evaluations on an HPC cluster, and documented methods for reproducibility. At Qualitest, I built a LangChain + RAG support chatbot with PostgreSQL vector retrieval, developed a cloud-agnostic storage service spanning Google Cloud Storage, S3, and MinIO, and implemented resilient workflows with AWS Step Functions and AWS Lambda. These projects required clear technical communication across teams and disciplined execution in agile, fast-paced environments.

ATC's mission to provide the latest technological solutions that help clients gain a competitive edge strongly resonates with me. I am equally aligned with your people-first, empathy-driven culture and commitment to continuous improvement. I would be excited to contribute to this mission with practical agent engineering, rigorous evaluation, and collaborative delivery. I would love to discuss my interest in this position with your team and can be reached at +1 (945) 304-5781 or khanosaid726@gmail.com. Thank you for your time and consideration, I look forward to connecting!

Sincerely,
Osaid Khan
